GREAT Brazil Select Portfolio

Portfolio Factsheet

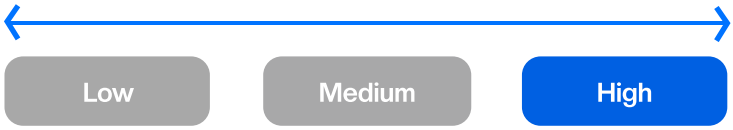

The GREAT Brazil Select Portfolio provides passive equity exposure to companies associated with the Brazilian economic ecosystem through publicly listed securities. The portfolio is designed to represent key segments of the Brazilian market across financial services, energy, utilities, telecommunications, and consumer-oriented businesses that contribute to the country's economic activity.
Constituent inclusion is based on predefined eligibility criteria assessing a company's material exposure to the Brazilian economy, including operational presence, revenue linkage, and market participation, rather than conventional sector classifications alone. The portfolio is intended for investors seeking long-term exposure to Brazil through a transparent, systematic, and institutionally structured investment approach.

Risk Indicator

Investment Objective

The portfolio seeks to provide long-term capital appreciation by delivering concentrated, systematic exposure to publicly listed companies with material linkage to the Brazilian economy, while managing concentration, liquidity, and structural risks associated with single-country investing.

Investment Methodology

- **Passive portfolio construction based on defined eligibility criteria**
- **Geographic framework focused on Brazil exposure**
- **No discretionary security selection or tactical positioning**
- **Monthly portfolio rebalancing to maintain allocation efficiency and diversification**

Portfolio composition is determined using predefined inclusion criteria assessing country exposure, market relevance, liquidity, and investability. Portfolio weights are constructed using a rules-based efficient frontier allocation framework. Portfolio changes are implemented through systematic monthly rebalancing in accordance with the established methodology.
